Turboram

Loading System

Make the perfect match

The loading system for the Turboram range makes it much easier to insert and remove trays. In addition, its flexible usage enables baked goods to be conveniently transported but also properly stored before baking.

The easiest way.
Our way

The design with protecting pvc canvas, allows easy handling and space saving.

Endurance and durability

With properties of high mechanical strength and good impact resistance, our loading trolley has been design to withstand mechanical and thermal operating conditions without deforming.

Double the production
Twice as easy

In the case of a Combi oven, the loading system opens and closes independently for each oven.
